### DETAILED ACTION

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-47 have been rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,750,508. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons:

Claims 1-4 are the narrow addressed by claim 1 with slight language difference specifically on said "buried electrode". However, the claimed expression to define the position of said buried electrode in relation to that of said drift layer, although differ from the way it was defined in the patent, the definition in the patent, however, reads on that of the claimed structure for one skilled in the art to conclude their structural similarities.

Claims 5-8 are covered by claim 2 of the patent.

Claims 9-12 are covered by claim 3 of the patent.

Claims 13-17 are covered by claim 4 of the patent.

Claims 18-21 are covered by claim 5 of the patent.

Claims 22-24 are covered by claim 6 of the patent.

Claims 26-28 are covered by claim 10 of the patent.

Claims 29-32 are covered by claim 7 of the patent.

Claims 33-37 are covered by claim 8 of the patent.

Claims 38-41 are covered by claim 1 since the source and well regions of the patent are formed above the drift layer, which is positioned below the two regions.

Claims 42-45 are covered by claim 9 of the patent.

Claims 46 and 47 are covered by claim 1 since there must be associated drain layer with the trench MOSFET.
